

## TECHNICAL DATA SHEET

### White Spirit

#### Product description:

It's a mineral spirit, mainly used for the dilution of synthetic and oleo-synthetic enamels. It has an optimal solvent power; its slow evaporation gives to the varnish product brightness and expansion.

Thanks to its high solvent power, it can be also used to clean airbrushes, brushes and tools stained with paint. Due to its purity features, the product is stable and does not deteriorate.

#### Operating instructions:

Dilute the paint until you reach the required fluidity, ideal to obtain the best spreading and lucidity of the product.

#### Advices

It is recommended to do a preliminary test before using the product on the final surface. Avoid release of the product and/or its packaging to the environment.

#### Chemical and physical characteristics

Specific weight: 0.79 +/- 0.01 g/mL

Flashpoint: > 39° C

Solubility: partially soluble in water

Colour: colourless

Physical status: colourless liquid

#### Delivery:

0,5 lt, 1 lt, 5 lt cans

25 lt drums

1000 lt IBC tank
