

TECHNICAL DATA SHEET

Odourless white spirit

Product description:

The odourless white spirit is a product that, after proper processing steps, loses its characteristic and strong smell. It is used for the dilution of all kinds of synthetic-based products, particularly for synthetic based coats – opaque coating – oleo-synthetic varnish – synthetic gloss and matt varnish – flattening and impregnating ones.

Operating instructions:

Pour it into the product you need to dilute, according to the usage percentages suggested by the manufacturer. It is recommended a gradual pouring and mixing, in order to get the perfect uniformity of the diluted product. Use it for cleaning surfaces, brushes and airbrushes stained with paint. After usage, close the case tightly. Keep it away from children and heat sources.

Advices

It is recommended to do a preliminary test before using the product. Use it according to the right work rules. Avoid release of the product and/or its packaging to the environment.

Chemical and physical characteristics

Aspect: colourless

Odour: distinctive

Boiling point: 130 C°- 200 C°

Flashpoint: > 21°C

Density: approximately 0.79 +/- 0.010 g/mL

Solubility: Insoluble in water

Delivery:

200 LT metallic drums

25 LT metallic drums

1 LT , 5 LT metallic cans
